

WE BUILD SOLAR
POWER PLANTS
TOGETHER WE BUILD
THE FUTURE

Pioneers in the construction of solar power plants in Serbia

200+ solar power plants

145+ MW installed power

300.000+ installed solar panels

WHO ARE WE

30+ engineers

70+
installers

Our companies employ:

- Mechanical engineers
- Electrical engineers
- Civil engineers
- Architectural engineers
- Traffic engineers
- Fire protection engineers
- Certified Installers
- Solar O&M providers
- Finance and business experts
- Philologist/translators
- Ecologists

30 years of experience gives us the right to claim that every one of your projects is in safe hands

Over

FOR DECADES WE'VE
BEEN CREATING FOR YOU.
WE CREATE SOLUTIONS
ACCORDING TO YOUR
NEEDS AND IDEAS.

Expertise

Over the past ten years, we have gradually supplemented our core business by participating in numerous projects for the construction of solar power plants.

Safety

With the introduction of new business segments on the domestic market, our engineers and installers had the opportunity to attend specially prepared training and to obtain the appropriate certificates.

We help you to produce clean energy in your solar power plant, on the roof of your building or on the ground, which will provide you with a reliable future, reduce bills and provide energy efficiency.

That's why we're confident in success.

That's why you can have confidence in us.

03 Reliability

You can rely on our team because you will receive full support at all stages of the project, from the development phase to the preparation of the technical acceptance documentation and obtaining the use permit.

the roof of your house

INDUSTRY

Solar power plant on the roof of your company

POWER PLANT ON GROUND

Solar power plant on ground connected to the grid for feed-in tariff production

WHY SHOULD YOU INVEST IN A SOLAR POWER PLANT?

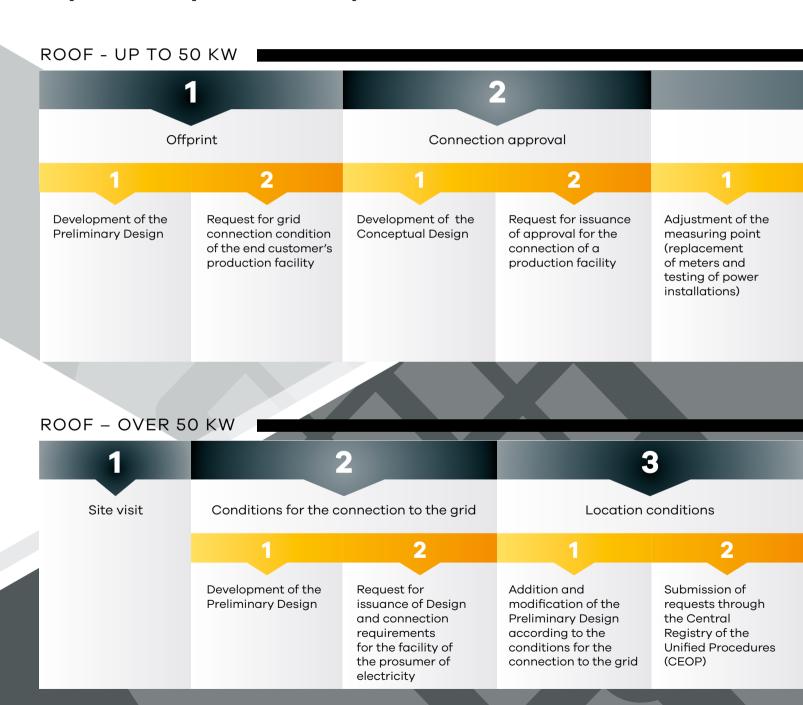

The investment in solar power plants pays off after 5-7 years.

WHY CHOOSE US?

HOW TO OBTAIN GREEN KILOWATTS?

We present the steps to facilitate the safe construction of a solar power plant on the roof of your facility or industrial plant

PROSUMER

3

Prosumer procedure after the construction of a solar power plant

2 4 5 6 Request for A request for trial After the accepted The solar power After the end of the trial concluding a operation is sent to reauest, the plant is registered run, additional checks contract with Elektrodistribucija commission from in the Register of and testing of the EPS on full EDS performs a Prosumers within quality of electricity, Srbije supply with net technical inspection a few days of the which is sent to the network, are carried and the solar power billing technical inspection plant is put into out. If everything is trial operation for a in order, the solar maximum period of power plant is put into

permanent operation

one year

5 6 Approval for the execution of works The request Request for the Prosumer for issuance conclusion of procedure after the of connection a contract on construction of a approval is sent providing services solar power plant to EDS for connection to (described above Development of Submission of the distribution in section 3) the Conceptual requests through grid Design the Central Registry of the Unified Procedures (CEOP)

SOLARIS ENERGY

SOLARIS ENERGY 1

Installed power 1,036 kWp

Panels Yingli Solar 4,232 × 245 Wp

Inverters 36 × 27.6 kW *Power-One Aurora Trio* 27.6

Construction Hilti

SOLARIS ENERGY 2

Installed power 1,058 kWp

Panels Yingli Solar 4,232 × 250 Wp Inverters 37 × 27.6 kW ABB TRIO 27.6

Construction Hilti

Location Kladovo

Construction year 2013

Purpose Selling electricity at open market

CO₂ reduction 2,324 t/year Production 2,582,254 kWh/year

The construction of **Solaris energy 3** and **Solaris energy 4** will commence in 2024, and the planned power of the power plants is about 2,600 kWp

WE SUCCESSFULLY COMBINE YOUR NEEDS AND OUR KNOWLEDG

The solar power plant we built in the village of Velesnica, the municipality of Kladovo has been producing green energy since 2013 for placement in the electrical distribution system.

In this solar power plant, we used photovoltaic polycrystalline panels and string inverters to convert the direct current generated in solar panels into alternating current.

Solaris is the first solar power plant in our country, and until recently, it was also the largest privately owned solar power plant. Investors can monitor energy production every day using the remote monitoring system.

Up to 2020, the company Solaris Energy delivered 20,000 MWh. On an annual basis, this solar power plant produces solar electricity needed to supply 600 houses.

Then, they introduced a novelty. They combined agriculture and solar energy. The land of IV and V category on which the solar panels are installed provides good grazing for the flock of sheep.

UNIOR

CO₂ reduction 1,014 t/year Production 1,268,074 kWh/year

Installed power 1,034 kWp

Panels Canadian Solar 370-375Wp

Inverters Fronius Symo 10-20 kW

Construction K2 Systems

Location Kragujevac Construction year 2021-2022

Purpose Own production

TOYO TIRE SERBIA

Installed power 8,417 kWp

Panels Canadian Solar 650-655 Wp Inverters Fronius Tauro ECO 100-3-P

Construction Sonnen Metal

Location Inđija

Construction year 2022-2023

Purpose Own consumption with

partial delivery to the system

CO₂ reduction

8,119 t/year

Production

10,148,927 Wh/year

BATTERY ENERGY STORAGE SYSTEM

Prepared battery energy storage system for **4 locations** in Serbia Total battery storage capacity amount to **23 MWh**

REFERENCES

Thirty power plants up to 10 kW were built on the roofs of private houses with a total power of 220 kWp.
