

MT-KOMEX D.O.O.
ENERGY SOLUTIONS

**WE BUILD SOLAR
POWER PLANTS
TOGETHER WE BUILD
THE FUTURE**

Pioneers in the
construction of solar
power plants in Serbia

230+
solar power plants

220+ MW
installed power

400.000+
installed solar panels

WHO ARE WE

30+
engineers

90+
installers

Our companies employ:

- Mechanical engineers
- Electrical engineers
- Civil engineers
- Architectural engineers
- Traffic engineers
- Fire protection engineers
- Certified Installers
- Solar O&M providers
- Finance and business experts
- Philologist/translators
- Ecologists

**Over
30 years of
experience**
gives us the right
to claim that every
one of your projects
is in safe hands

**FOR DECADES WE'VE
BEEN CREATING FOR YOU.
WE CREATE SOLUTIONS
ACCORDING TO YOUR
NEEDS AND IDEAS.**

01 Expertise

Over the past ten years, we have gradually supplemented our core business by participating in numerous projects for the construction of solar power plants.

02 Safety

With the introduction of new business segments on the domestic market, our engineers and installers had the opportunity to attend specially prepared training and to obtain the appropriate certificates.

03 Reliability

You can rely on our team because you will receive full support at all stages of the project, from the development phase to the preparation of the technical acceptance documentation and obtaining the use permit.

We help you to produce clean energy in your solar power plant, on the roof of your building or on the ground, which will provide you with a reliable future, reduce bills and provide energy efficiency.

**That's why we're confident in success.
That's why you can have confidence in us.**

CONCEPT

SOLAR POWER PLANTS

HOUSEHOLDS

A solar power plant on the roof of your house

INDUSTRY

Solar power plant on the roof of your company

POWER PLANT ON GROUND

Solar power plant on ground connected to the grid for feed-in tariff production

WHY SHOULD YOU INVEST IN A SOLAR POWER PLANT?

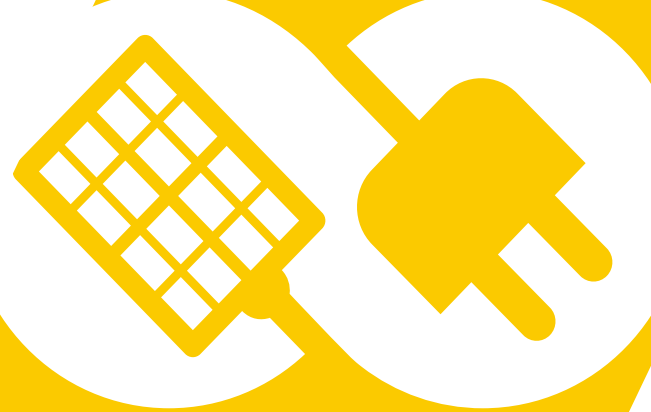

The investment in solar power plants pays off after 5-7 years.

WHY CHOOSE US?

You can rely on our team of almost 100 engineers and installers, certified and trained to work with special software and tools.

Another advantage is that we can offer you the turnkey construction of solar power plants.

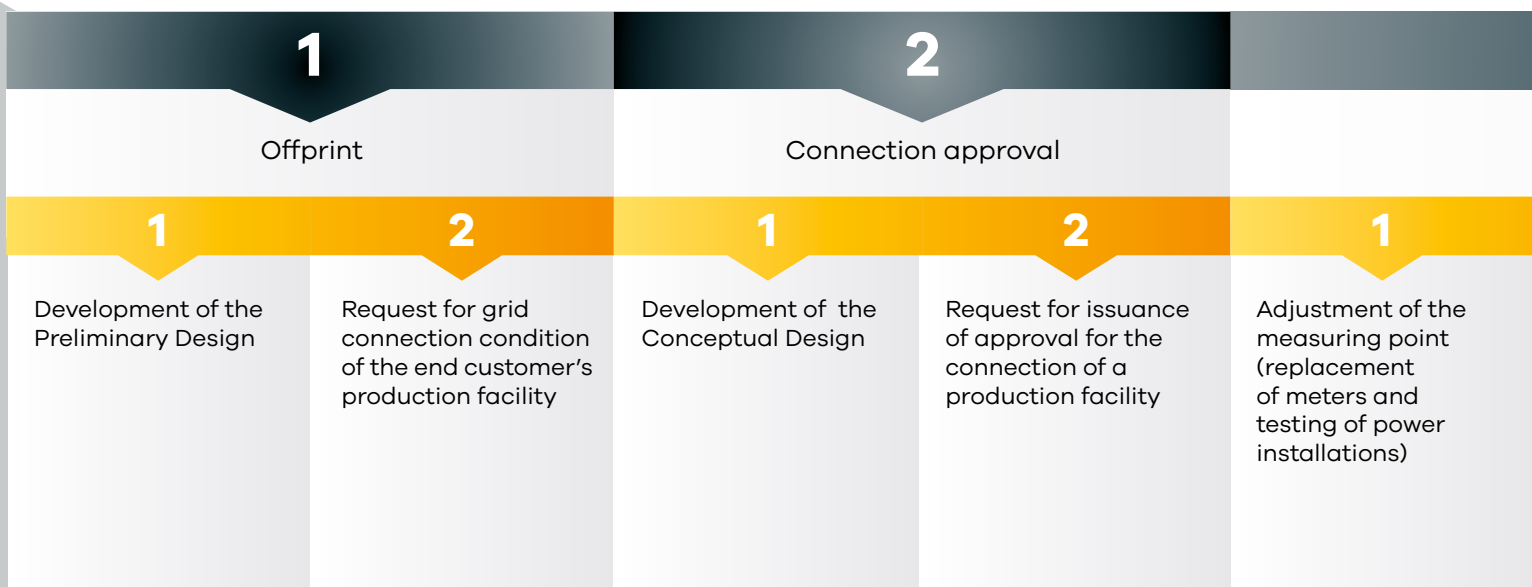

Our partner company, Ceefor, has a decade of experience designing solar power plants and obtaining the necessary permits.

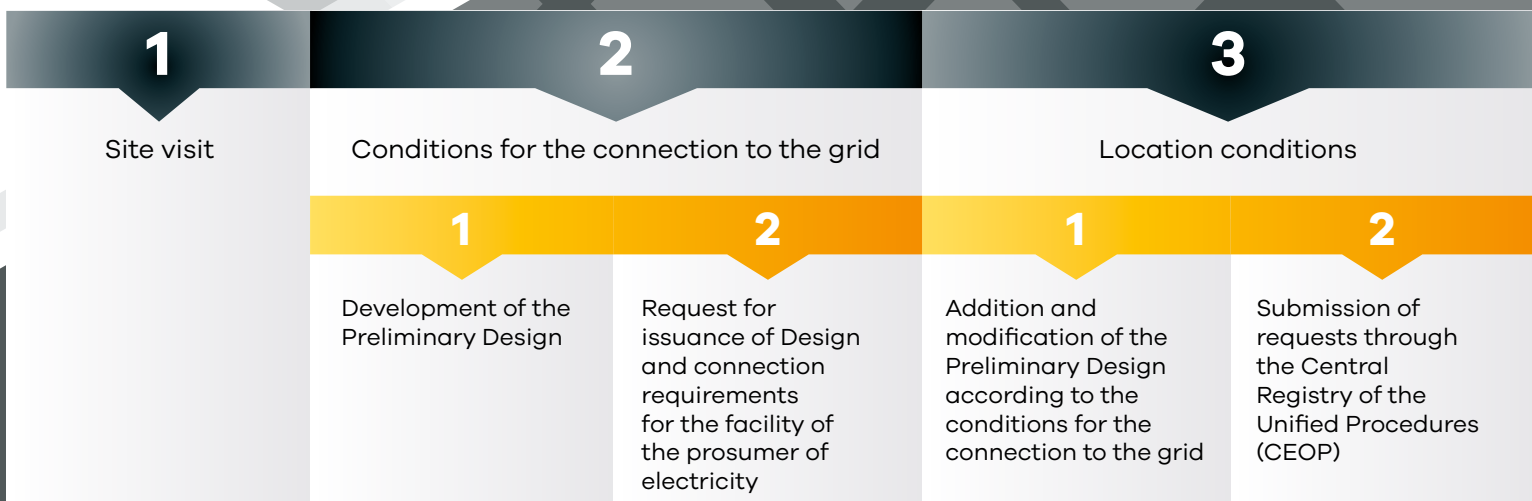

HOW TO OBTAIN GREEN KILOWATTS?

We present the steps to facilitate the safe construction of a solar power plant on the roof of your facility or industrial plant

ROOF - UP TO 50 KW

ROOF – OVER 50 KW

3

Prosumer procedure after the construction of a solar power plant

2

Request for concluding a contract with EPS on full supply with net billing

3

A request for trial operation is sent to Elektro distribucija Srbije

4

After the accepted request, the commission from EDS performs a technical inspection and the solar power plant is put into trial operation for a maximum period of one year

5

The solar power plant is registered in the Register of Prosumers within a few days of the technical inspection

6

After the end of the trial run, additional checks and testing of the quality of electricity, which is sent to the network, are carried out. If everything is in order, the solar power plant is put into permanent operation

4

Approval for the execution of works

5

The request for issuance of connection approval is sent to EDS

6

Request for the conclusion of a contract on providing services for connection to the distribution grid

7

Prosumer procedure after the construction of a solar power plant (described above in section 3)

1

Development of the Conceptual Design

2

Submission of requests through the Central Registry of the Unified Procedures (CEOP)

SOLARIS ENERGY

SOLARIS ENERGY 1

Installed power 1036 kWp
Panels Yingli Solar 4232 × 245 Wp
Inverters 36 × 27,6 kW Power-One
Aurora Trio 27,6
Construction Hilti

SOLARIS ENERGY 2

Installed power 1058 kWp
Panels Yingli Solar 4232 × 250 Wp
Inverters 37 × 27,6 kW ABB TRIO 27,6
Construction Hilti

Smanjenje CO₂ 2.324 t/year
Production 2.582,26 MWh/year

SOLARIS ENERGY 3

Installed power 1561,6 kWp
Panels AIKO-G640-MCH72Dwp
Inverters 11 × 100 kW, Huawei
Sun2000-100KTL-M2).
Construction IPOS

Production 1.838,1 MWh/year

SOLARIS ENERGY 4

Installed power 1308,16 kWp
Panels AIKO-G640-MCH72Dwp
Inverters 11 × 100 kW, Huawei
Sun2000-100KTL-M2).
Construction IPOS

Production 1.838,1 MWh/year

Location Kladovo
Construction year Solaris 1-2, 2013
Solaris 3-4, 2025
Purpose Selling electricity
at open market

WE SUCCESSFULLY COMBINE YOUR NEEDS AND OUR KNOWLEDG

The solar power plant we built in the village of Velesnica, the municipality of Kladovo has been producing green energy since 2013 for placement in the electrical distribution system.

In this solar power plant, we used photovoltaic polycrystalline panels and string inverters to convert the direct current generated in solar panels into alternating current.

Solaris is the first solar power plant in our country, and until recently, it was also the largest privately owned solar power plant. Investors can monitor energy production every day using the remote monitoring system.

Up to 2020, the company Solaris Energy delivered 20,000 MWh. On an annual basis, this solar power plant produces solar electricity needed to supply 600 houses.

Then, they introduced a novelty. They combined agriculture and solar energy. The land of IV and V category on which the solar panels are installed provides good grazing for the flock of sheep.

UNIOR

CO₂ reduction

1,014 t/year

Production

1,268,074 kWh/year

Installed power	1,034 kWp
Panels	<i>Canadian Solar 370-375Wp</i>
Inverters	<i>Fronius Symo 10-20 kW</i>
Construction	<i>K2 Systems</i>

Location	Kragujevac
Construction year	2021-2022
Purpose	Own production

TOYO TIRE SERBIA

Installed power 8,417 kWp
Panels *Canadian Solar 650–655 Wp*
Inverters *Fronius Tauro ECO 100–3–P*
Construction *Sonnen Metal*

Location Indija
Construction year 2022–2023
Purpose Own consumption with
partial delivery to the system

CO₂ reduction

8,119 t/year

Production

10,148,927 Wh/year

TOYO TIRES

BATTERY ENERGY STORAGE SYSTEM

Prepared battery energy storage system for **4 locations** in Serbia
Total battery storage capacity amount to **23 MWh**

SUNTASTIC 1 i 2

CO₂ reduction

14.872 + 7.370 t/year

Production

13.548 + 6.844 MWh/year

Installed power	10.398 + 5.258 kWp
Panels	15.408 + 7.878 Luxen Solar LNVH-625ND 625Wp 1.200 + 528 AIKO Solar G640-MCH72Dw 640Wp
Inverters	28 + 15 Huawei SUN2000-330KTL-H1
Construction	Kıraç Metal

Location	Aleksinac
Construction year	2024-2025.

Purpose: Selling
electricity at open
market

B2 NOVA SUN

Installed power 11.101,20 kWp
Panels *Canadian Solar 660–655 Wp*
Inverters *Fronius Tauro ECO 100–100 kW*
Construction *za bifacijalne panele, Kirač Metal*

Location Nova Crnja
Construction year 2023–2024.
Purpose Selling electricity
at open market

CO₂ reduction

15.365 t/year

Production

13.968 MWh/year

DELASOL

Installed power	11,760 kWp
Panels	<i>Canadian Solar 650–655 Wp</i>
Inverters	<i>Fronius Tauro ECO 100–3–P</i>
Construction	<i>Sonnen Metal</i>

Location	Lapovo
Construction year	2022–2023
Purpose	Selling electricity at open market

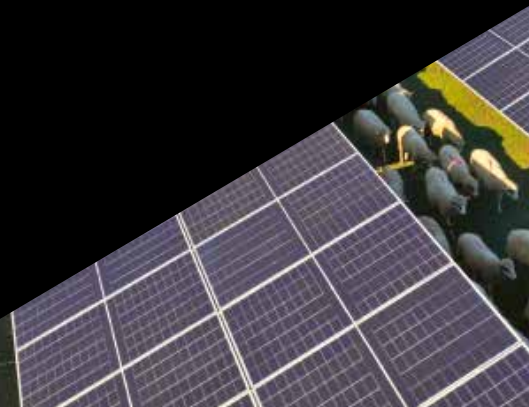

CO₂ reduction 14,599 t/year
Production 15,664,320 kWh/year

DELASOL NORTH

Installed power	11,880 kWp
Panels	<i>Canadian Solar 650–660 Wp</i>
Inverters	<i>Fronius Tauro ECO 100–3–P</i>
Construction	<i>Kıraç Metal</i>

Location	Lapovo
Construction year	2024–2025
Purpose	Selling electricity at open market

CO₂ reduction 14,625 t/year
Production 15,692,292 kWh/year

OUR PARTNERS

AIKO is a world-leading company for the development and production of solar panels.

Canadian Solar is among the world's top 10 solar panel manufacturers.

The German company Luxor Solar is a global manufacturer of highly efficient solar panels.

Fronius International GmbH is an Austrian company of photovoltaic inverters that is among the best in the world.

Huawei is a world-famous brand. They produce high-quality inverters.

K2-systems is a German manufacturer of mounting systems for solar panels.
