

MT-KOMEX D.O.O.
ENERGY SOLUTIONS

**WE BUILD SOLAR
POWER PLANTS
TOGETHER WE BUILD
THE FUTURE**

Pioneers in the
construction of solar
power plants in the region

300+
solar power plants

250+ MW
installed power

500,000+
installed solar panels

WHO ARE WE?

25+

Engineers

90+

Installation
& Service
Technicians

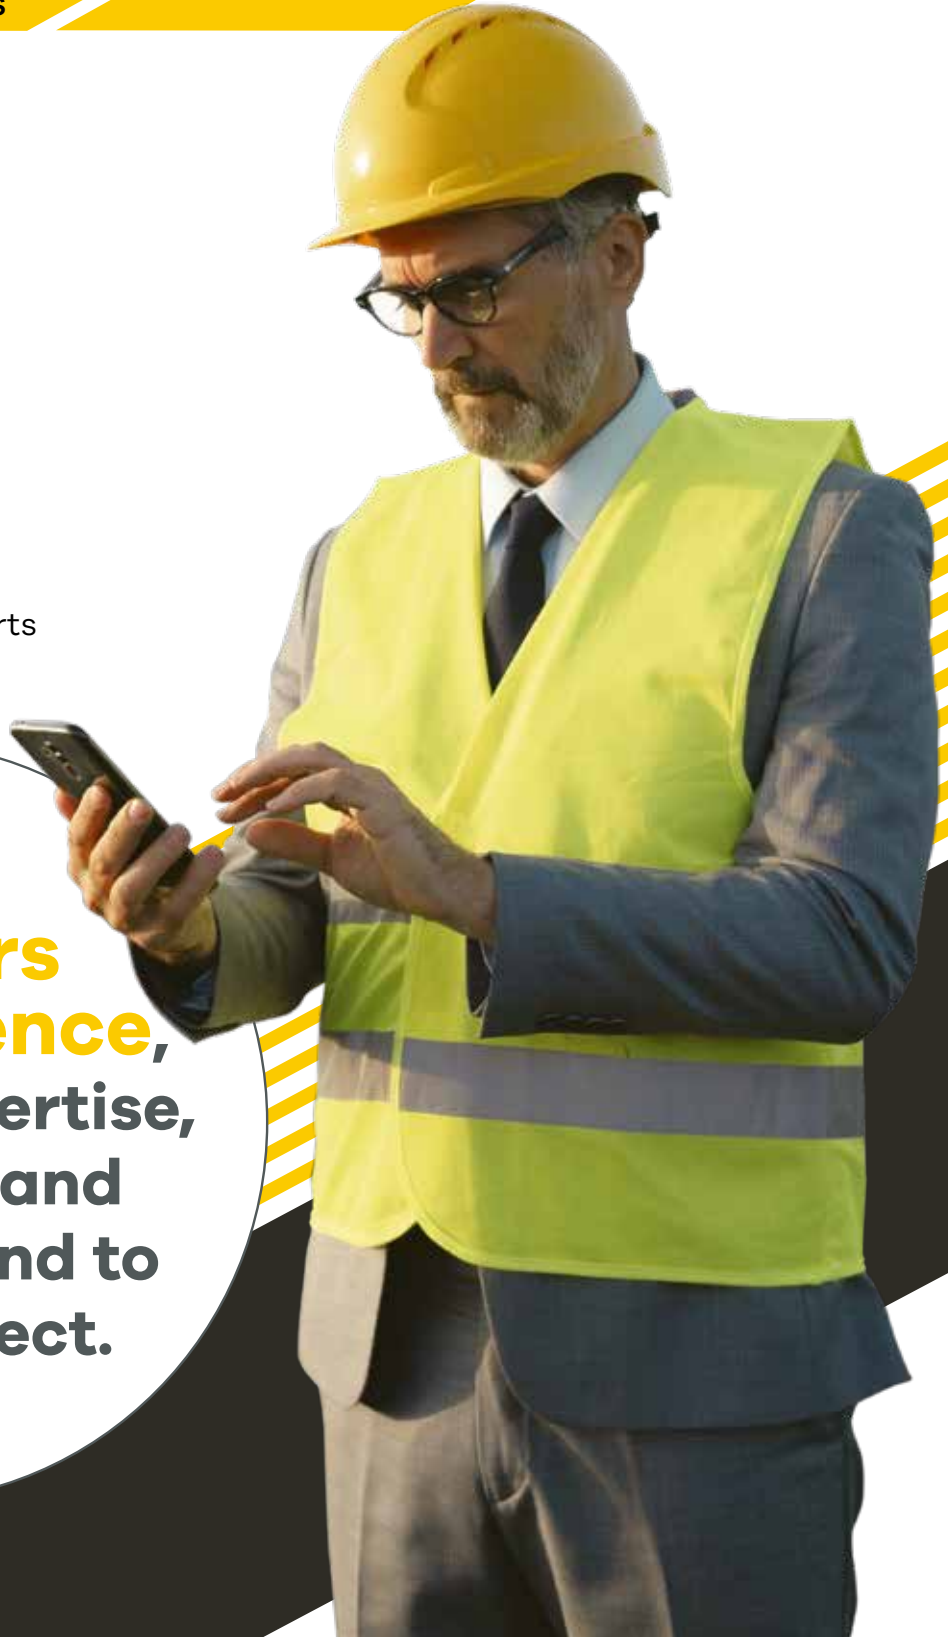

15+

Administration
& Logistics Staff

Our companies employ:

- Mechanical engineers
- Electrical engineers
- Civil engineers
- Architectural engineers
- Traffic engineers
- Fire protection engineers
- Certified Installers
- Solar O&M providers
- Finance and business experts
- Translators
- Ecologists

**With
34 years
of experience,
we bring expertise,
reliability, and
peace of mind to
every project.**

**FOR DECADES WE'VE
BEEN CREATING FOR YOU.
WE CREATE SOLUTIONS
ACCORDING TO YOUR
NEEDS AND IDEAS.**

01 Expertise

Over the past ten years, we have gradually supplemented our core business by participating in numerous projects for the construction of solar power plants.

02 Safety

With the introduction of new business segments on the domestic market, our engineers and installers had the opportunity to attend specially prepared training and to obtain the appropriate certificates.

03 Reliability

You can rely on our team because you will receive full support at all stages of the project, from the development phase to the preparation of the technical acceptance documentation and obtaining the use permit.

We help you to produce clean energy in your solar power plant, on the roof of your building or on the ground, which will provide you with a reliable future, reduce bills and provide energy efficiency.

**That's why we're confident in our success.
That's why you can trust us.**

CONCEPT

SOLAR POWER PLANTS

HOUSEHOLDS

Rooftop Solar Power Plant
for a Private Household

INDUSTRY

Rooftop Solar
Power Plant for
an Industrial or
Commercial Facility

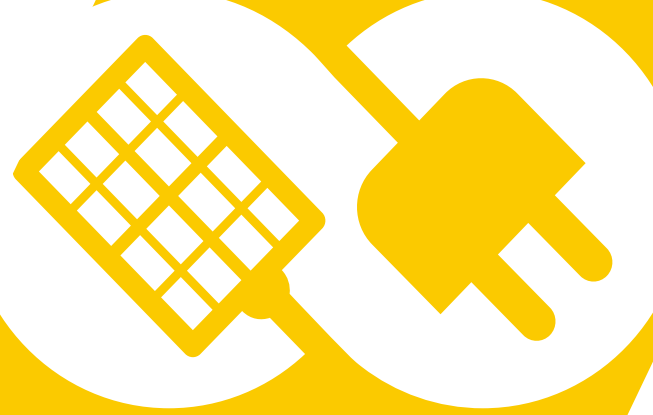

GROUND-MOUNTED SOLAR POWER PLANT

Solar Power Plant
for Grid-Connected
Electricity Generation

WHY SHOULD YOU INVEST IN A SOLAR POWER PLANT?

Investing in solar power plants pays off in 5-7 years.

WHY CHOOSE US?

You can rely on our team of almost 120 engineers and installers, certified and trained to work with special software and tools.

Another advantage is that we can offer you the turnkey construction of solar power plants.

Our partner company, CEEFOR, has 16 years of experience in the design and permitting of solar power plants.

COMMITMENT TO QUALITY

High standards of business practice are an integral part of the way we work and are certified by TMS.

MONITORING & SERVICE

24/7

- **Two monitoring centers** – Belgrade and Lapovo
- Our team of **20 qualified service technicians** continuously monitors the operation of solar power plants, performs preventive and corrective maintenance, and ensures a fast and timely on-site response.

Our service infrastructure enables continuous monitoring, reliable system performance, and maximum plant availability.

POWERING A SUSTAINABLE FUTURE

We apply sustainability principles to our own operations as well. We have replaced almost our entire fleet of vehicles used by our administrative and engineering teams with **electric vehicles** powered by energy from renewable sources.

A solar power plant with an energy storage system is installed on the roof of the MT-KOMEX headquarters, providing green energy for the company's operations and charging its electric vehicles.

We integrate clean energy generation, energy storage, and electric mobility into a single, sustainable energy system.

DELASOL

TWO-PLANT SOLAR POWER COMPLEX

DELASOL

Installed power	11,760 kWp
Panels	<i>Canadian Solar 650–655 Wp</i>
Inverters	<i>Fronius Tauro ECO 100–3–P</i>
Construction	<i>Sonnen Metal</i>
Location	Lapovo
Construction year	2022–2023
Purpose	Selling electricity on the open market

CO₂ reduction **14,599 t/year**
Production **15,664.3 MWh/year**

DELASOL NORTH

Installed power	13,000 kWp
Panels	<i>Aiko Solar 650 Wp</i>
Inverters	<i>Huawei Sun 2000-110KTL</i>
Construction	<i>Sigma Energy</i>
Location	Lapovo
Construction year	2023–2024
Purpose	Selling electricity on the open market

CO₂ reduction
14,625 t/year
Production
15,692.3 MWh/year

One of the largest stocks of solar equipment in the region, valued at more than €10 million

LOGISTICS CENTER IN LAPOVO

With **2,000 m² of enclosed** and **10,000 m² of open storage space**, the MT-KOMEX logistics center in Lapovo serves as a strategic hub for the delivery of solar projects. By ensuring the availability of key equipment, efficient logistics, and reliable supply, our facilities enable **faster project execution and greater security at every stage of construction.**

In the municipality of Lapovo, **DeLasol** was developed as a complex of two solar power plants with a total grid connection capacity of **nearly 20 MW.**

HEMOFARM

CO₂ reduction

5,319 t/year

Production

5,164.21 MWh/year

Installed power	4,738.29 kWp
Panels	Luxor Solar, Bifacial LX-590M/182-144+ GG BiF1500V, individual capacity 590 Wp
Inverters	Huawei, SUN2000-50KTL-M3, 50 kW
Construction	K2 Multi Rail, Mini Rail, D-dome LS, Dome Zero
Location	Vršac
Construction year	2025-2026
Purpose	Own consumption

TOYO TIRE SERBIA

Installed power 8,417 kWp
Panels *Canadian Solar 650–655 Wp*
Inverters *Fronius Tauro ECO 100–3–P*
Construction *Sonnen Metal*

Location Indija
Construction year 2022–2023
Purpose Own consumption with
partial delivery to the system

CO₂ reduction

8,119 t/year

Production

10,148,927 kWh/year

B2 SUN SPOT 2

Installed power	14,008 kWp
Panels	21,552 × Aiko Solar 650 Wp
Inverters	36 × Huawei Sun 2000-300KTL
Construction	Powerway
Location	Kikinda, Mokrin
Construction year	2026
Purpose	Selling electricity on the open market

CO₂ reduction

17,844 t/year

Production

19,189 MWh/year

**THE FIRST
SOLAR POWER
PLANT IN SERBIA
TO FEATURE
A TRACKING
SYSTEM**

B2 NOVA SUN

Installed power 11,101.20 kWp
Panels *Canadian Solar 660–655 Wp*
Inverters *Fronius Tauro ECO 100–100 kW*
Construction for bifacial panels, *Kıraç Metal*

Location Nova Crnja
Construction year 2023–2024
Purpose Selling electricity
on the open market

CO₂ reduction

15,365 t/year

Production

13,968 MWh/year

Solar Power Plants

REFERENCES

Thirty power plants up to 10 kW were built on the roofs of private houses with a total power of **220 kWp**.

	PROJECT	DC (kWp)	AC (kW)	TYPE	STATUS

BATTERY ENERGY STORAGE SYSTEMS (BESS)

We develop advanced BESS solutions designed to maximize the value of renewable energy:

- Optimize energy generation and consumption
- Enhance grid stability and flexibility
- Maximize the value of stored energy through energy arbitrage
- Reduce peak demand and energy costs
- Ensure reliable backup power
- Seamlessly integrate with solar power plants

Battery Energy Storage Systems are currently under development in Serbia:

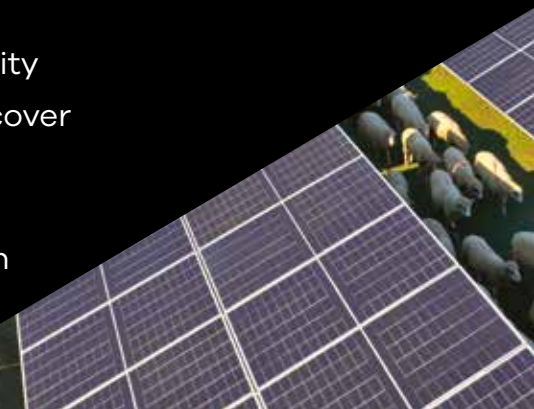

6 co-located systems with a total capacity of **60 MWh** and

3 stand-alone systems with a total capacity of **740 MWh**.

SMART ENERGY FOR A SECURE FUTURE

BENEFITS FOR THE PLANT OPERATOR

- Shifting excess midday energy to evening hours, when demand and energy prices are higher
- Maximizing the utilization of available grid connection capacity
- Smoothing fluctuations in solar generation caused by cloud cover
- Providing reactive power and voltage support at the point of connection
- Increasing flexibility in adapting generation and consumption
- Optimizing the use of existing grid infrastructure while reducing investment requirements

OUR PARTNERS

We work with leading global manufacturers of solar equipment and technologies to provide our clients with reliable, innovative, and high-quality solutions.
